

Global Green Tax

Transforming Tax

Complexity into Net

Cash

Pitch Deck Pre-Seed 2026

Administrative Chaos Slows Down Transition

European SMEs blindly navigate a labyrinth of 27 national legislations without clear visibility on available tax opportunities.

Result: 30% of state aid remains unclaimed, while traditional consulting remains inaccessible with costs exceeding €2,500 and deadlines incompatible with entrepreneurial agility.

THE SOLUTION

Tax intelligence for climate action

The job of a Big Four expert, automated in 3 clicks

Scan & Match

Instant analysis of quotes and automatic matching with available subsidies

Multi-Country Engine

Native coverage of 27 European jurisdictions with real-time regulatory updates

Certified Reports

"Audit-Ready" PDF documents compliant with tax authorities' standards

An unprecedented planetary alignment

24M

SMEs in Europe

Total addressable market representing the backbone of the European economy

65€

Carbon Price/t

Increasing economic pressure accelerating the adoption of green solutions

100%

Mandatory ESG

Now an essential criterion for access to bank credit

Strategic Focus

Our entry point: the Benelux + France hub, an area concentrating the highest density of fiduciaries and companies committed to the climate transition.

This region represents the ideal ground to validate our model before pan-European expansion.

High-margin scalability

SaaS Pro

€499/month — Designed for fiduciaries managing SME portfolios. Unlimited platform access, priority support, and multi-client dashboards.

Enterprise

Annual license + Success fees — For large organizations with API integration needs and customized workflows. Remuneration aligned with results.

Gross Margin

100% automated operations ensuring exceptional profitability

Proprietary "Strategy Pattern" Architecture

Our competitive advantage relies on a technical infrastructure designed for speed and security.

Lightning Expansion

Adding a new country in less than an hour thanks to our modular architecture

Bank-Grade Security

Full OWASP audit, end-to-end encryption, and native RGPD compliance

Multi-tenant Isolation

Strict separation of client data ensuring total confidentiality

Dominating the Luxembourg Hub

Targeted Acquisition Strategy

01

Phase 1: Luxembourg Anchoring

Acquisition of the 20 largest fiduciaries in the country, representing 60% of the local market

02

Phase 2: Mechanical Expansion

Automatic deployment to FR, DE, BE subsidiaries via existing networks

03

Phase 3: Network Effect

Viral growth driven by peer recommendations and success stories

Augmented Solopreneur Model

5x faster development velocity thanks to generative AI. No office, no bureaucracy, just code and scale.

Our Philosophy

Maximum efficiency comes from organizational simplicity. A technical founder armed with the latest generation AI tools can accomplish what yesterday required a team of 10 people.

This approach allows us to maintain unparalleled agility, pivot instantly according to market feedback, and reinvest every euro into technology rather than infrastructure.

The result: a time-to-market divided by five and continuous innovation capacity.

THE OPPORTUNITY

€250,000 to accelerate

Strategic Allocation

- **60% Sales & Expansion** — Acquisition of the first 20 Luxembourg fiduciaries and Benelux business development
- **30% Proprietary R&D** — Development of the internal OCR engine to eliminate any dependence on third-party APIs
- **10% Legal Infrastructure** — Multi-jurisdictional compliance and IP protection

Runway: 18 months until break-even.

Your Questions, Answered

Addressing common inquiries about Global Green Tax and our vision.

What core problem does Global Green Tax address?

We solve the administrative chaos faced by European SMEs navigating complex, multi-national green tax legislations. This chaos leads to significant unclaimed state aid and high consulting costs, hindering their transition to sustainable practices.

How does Global Green Tax automate the process?

Our platform automates the work of a Big Four expert in three clicks: it scans quotes, matches them with available subsidies across 27 European jurisdictions with real-time updates, and generates audit-ready reports.

What is your business model and target market?

Our model includes a SaaS Pro subscription for fiduciaries and an Enterprise license for larger organizations, both offering high gross margins due to automation. Our initial focus is the Benelux + France hub, a strategic entry point for pan-European expansion.

What is the unique advantage of your technology?

Our proprietary "Strategy Pattern" architecture allows lightning-fast expansion (new country in under an hour), ensures bank-grade security with full OWASP audit and end-to-end encryption, and provides multi-tenant isolation for total client data confidentiality.
